

OWASP ModSecurity Core Rule Set

THE 1ST LINE OF DEFENSE

OWASP ModSecurity Core Rule Set Project

A call for sponsors

What is CRS?

Set of generic attack detection rules for web application firewalls

Protection from web application security risks as described in the OWASP Top Ten

Standard OSS rule set for ModSecurity

Who uses CRS / has a CRS offering?

Microsoft Azure

Amazon AWS

Google Cloud Armor

Verizon Media

Akamai

Cloudflare

Fastly

Oracle Cloud

AVI Networks

NGINX+ (F5)

CPanel

LiteSpeed

Varnish

GitLab

Current Development

- **Better coverage of Request Smuggling Attacks**
- **Better coverage of JS/Node injections**
- **Support parameter decoding out of the box (base64, hex, unicode, htmlentities, escapeSeqs, etc.)**
- **Rule exclusion package for Hosters / CDNs to reduce False Positives**
- **CAPEC Tagging for CRS rules as a base for reporting**
- **Setting up demo sites where people can probe CRS**

Call for Sponsors

By sponsoring OWASP CRS, you support a Flagship OWASP project.

The OWASP Flagship designation is given to projects that have demonstrated strategic value to OWASP and application security as a whole.

What you pay

All proceeds from the sponsorship support the further development of CRS

- **CRS participation in OWASP conferences and summits**
- **CRS Developer summits / CRS Community summits**
- **Technical support for users on github, slack, stackoverflow and via mail**
- **Project coordination**
- **Marketing & PR support**

In short: All the administrative work around the project distracts from our core mission. We try to fund that work via sponsors so we can concentrate on rule writing again.

Sponsor Benefits

- **A stronger CRS protecting you and your users**
- **Recognition on our website and in our releases**
- **Visibility during the CRS summits**
- **Direct contact with our developers**

Pricing

We offer two sponsorship levels

- **Silver: 5 digit sum**
